Editor's Message

Dear Readers

I hope all of you will be doing well. First of all, let me thank you for taking time out from your busy schedule for reading the latest issue of Spotlight that is in your hands. This issue of Spotlight presents a brief description of various academic/research/co-curricular and extra-curricular activities during the last six months at University of Haripur. At University of Haripur we are continuously aiming to provide a stable and conducive learning environment to our students in order to make them competitive at the national/international level.

Spotlight not only act as medium of communication with our stakeholders but also act as a medium of

acknowledging the outstanding contributions of students, faculty and staff. No organization can successfully survive without the support of community and we are thankful to our community for their continuous support and hope that they will continue to support us in future also.

I would also like to take this opportunity to thank all those who have submitted their contributions for this issue of Spotlight. The assistance and guidance from the top management and technical team is highly appreciated. Please feel free to provide your feedback and send pertinent information with photos for inclusion in our forthcoming issues.

The University of Haripur at a Glance

The existing campus of UoH covers an area 236 Kanals and was in the administrative control of Forest Development Corporation (FDC), Khyber Pakhtunkhwa till January, 2008. This was Rosin and Turpentine factory being established in 1953 for the purpose of fulfilling rosin and turpentine requirements of Hazara region in particular and rest of the country in general. Due to non-availability of raw material the factory was abandoned in 1980 and remained idle for almost two and a half decades.

In view of its strategic location (lying at the confluence of two industrial zones namely Hattar and Gadoon industrial estates), availability of necessary infrastructure and reasonably sufficient land available for future expansion, it was felt seriously to make efficient use of the former factory. The then Vice Chancellor, Hazara University initiated dialogues with the provincial government and FDC and finally the factory was handed over to Hazara University and was given the status of Haripur Campus-Hazara University on March 8, 2008.

The academic journey in Haripur Campus started in April, 2008 with initial enrollment of 150 students in 03 academic departments. Since then till 2012 significant growth was witnessed in diverse spheres and the number of students raised to over 1600 in 07 academic departments. Similarly the number of faculty members raised from 05 in 2008 to 83 in 2012 (of which 18 were PhD, 30 MS/Mphil and 35 M.A/M.Sc).

In view of significant growth and tremendous students from district Haripur and its adjoining areas (Hassanabal, Chaj, Swabi, Mardan, Pindi and Islamabad etc), the Haripur campus came up with three clear and distinguished features;

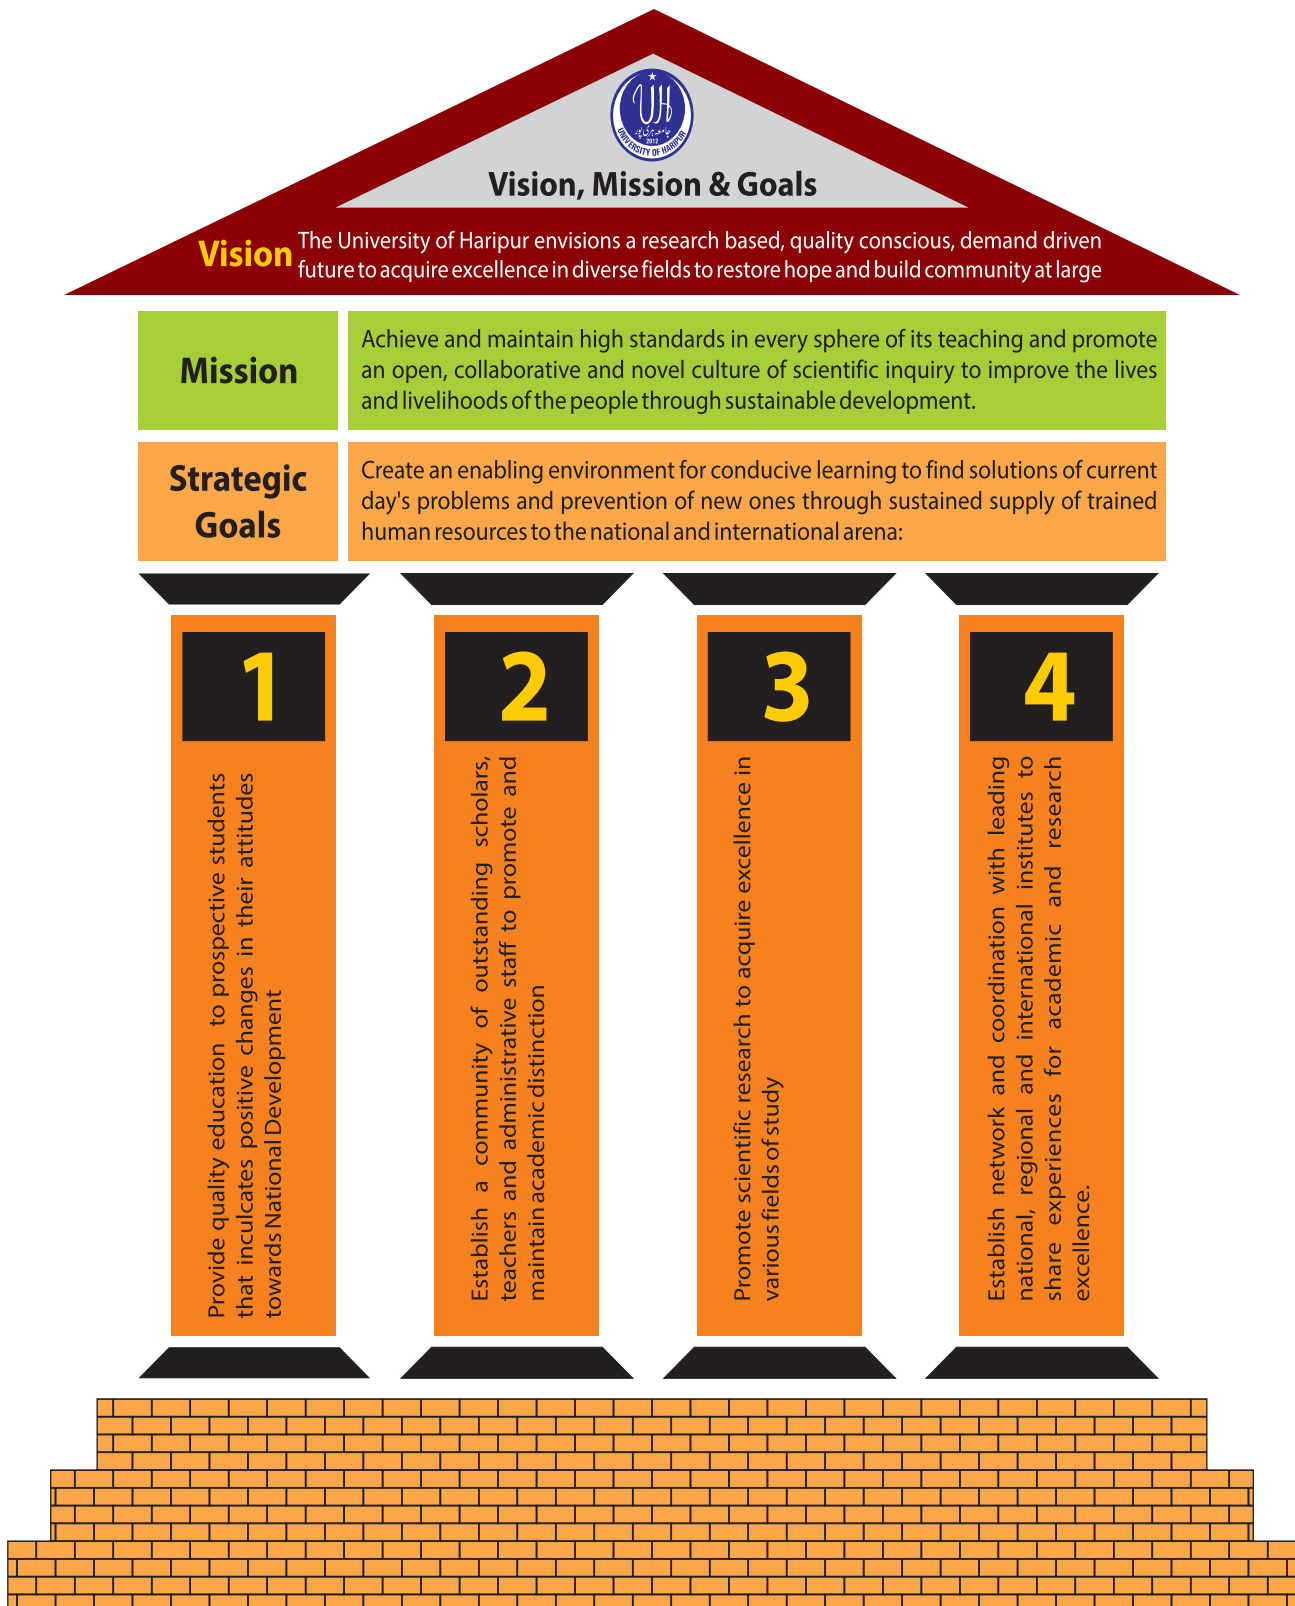

- ❑ Firstly, it proved that there is huge potential at Haripur campus to attract thousands of students from Haripur and its adjoining districts. It attracted more than sixteen hundred students in just seven academic departments functional over a period of 04 years. It is worth mentioning that the campus had only two departments under faculty of sciences i.e. Department of Environmental Sciences and Agricultural Sciences. With establishment of other departments in the field of Sciences such as Chemical Science, Biological Science, Physical and Health Sciences, this enrollment could boost by 2-3 times.
- ❑ Secondly, the number of female enrollment in different programs being offered is more than 67%. This high enrollment ratio of female students, even lacking hostel facilities at campus, clearly indicates

the potential for female education demand in Haripur and its adjoining cities.

- ❑ Third and lastly, the commencement of postgraduate programs (M.Phil/Ph.D) in Environmental Sciences, Agriculture, Education and Islamic and Religious Studies has proved highly successful. The campus has received high student support in these programs. Total enrollment being offered by the Department of Environmental Sciences alone stood at 100 plus in 6 batches. Based on current rate of increase and future demands, it was estimated that enrollment will rise up to 5000 with commencement of five more departments.

The scenario elaborated above provided strong basis for the up-gradation of Haripur Campus to the status of an independent public sector university. The case was taken up by the HED-KPK on March 24, 2012 and the project for UoH was approved followed by passing of Act from KPK assembly on July 04, 2012. The first Vice Chancellor was appointed on September 04, 2012 and UoH was formally recognized as an independent Public Sector University by HEC on January 10, 2013.

1st International Workshop on Nano Science and Technology 2018

Allied department in collaboration with Business Incubation Center (BIC) and the Higher Education Commission of Pakistan (HEC) organized first International workshop on Nano Science and Technology 2018 to provide a forum for discussing various issues related to the field of Nano Science and Technology. Workshop on Time Management "So Much to Do, So Little Time"

Career Development Center organized a one day workshop on time management for newly inducted students. The basic purpose of workshop was to educate students about time management, its importance, how to avoid frustration created by mismanagement of time, identify time waster and investor activities, how to make daily, weekly and monthly schedule, skill set and time management and how time management lead towards happiness and satisfaction

Workshop on Time Management "So Much to Do, So Little Time"

During the interactive session, students were asked about their routine activities to identify the most common activities of the students. Question was asked about why they perform all these acts in order to get students oriented about the conscious and unconscious routine jobs. Groups were created to perform three activities during workshop. First was to identify the time wasters, second was to manifest the time investor activities while third was to calculate the 24 hours' time they spend and know the left-over free time. Students were astonished to know that they have plenty of time to invest if they plan properly.

The resource person motivated students to make schedules in their life by prioritizing the activities according to their importance to increase the productivity of their life.
